

## Choose **HIGH PERFORMANCE** for **METAL ROOFING**

Synthetic Underlayment is a critical component of the roof deck protection system. Titanium® Synthetic Underlayment creates a durable, tough barrier under metal roofs.

Titanium® is one of the most preferred heavyweight synthetic underlayment brands contractors rely on. Whether installing a batten metal system or directly over asphalt shingles, Titanium® Synthetic Underlayment has several benefits:

- **Sure-Foot® Technology** – the patented nodular walking surface creates safer walking conditions on steep slope applications
- **Cool Work Surface** – the gray underlayment provides a cooler working surface during installation
- **High Temp** – Titanium® is engineered to perform in temperatures up to 240° F
- **Durable** – Resists tearing around nails and fasteners even in extreme conditions
- **Water / Vapor Barrier** – Creates a second line of defense against water infiltration
- **UV Exposure** – Excellent exposure can withstand the elements

**TITANIUM® COMES WITH A LIMITED LIFETIME WARRANTY.\***
